Islamabad, Pakistan ♦ +92 340 9582892

shahrozkhalid397@gmail.com — linkedin.com/in/shahroz-khalid-919262332 — github.com/SHEHROZ53531

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in Software Development, Artificial Intelligence, Machine Learning, Flutter, and Backend Development. Proficient in Python, Java, SQL, Flutter, and Scikit-learn with experience building intelligent software systems from development to deployment. Passionate about Agentic AI, Large Language Models (LLMs), Multimodal RAG, and scalable backend applications.

EDUCATION

BS Computer Science

Expected Spring 2027

Riphah International University, Islamabad

Relevant Coursework: Artificial Intelligence, Data Structures, Algorithms, Backend Development

TECHNICAL SKILLS

Programming: Python, Java, C++, SQL, Dart, HTML, CSS

AI / ML: Machine Learning, NLP, Scikit-learn, Sentiment Analysis

Mobile: Flutter, Cross-platform Development, Responsive UI

Backend: Java, JDBC, REST APIs, Database Integration

Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebook

Concepts: OOP, Data Structures, Algorithms, System Design

Learning: Agentic AI, LLMs, Deep Learning, React, Node.js

Soft Skills: Problem Solving, Team Collaboration, Communication

PROJECTS

ChurnIQ – Telco Customer Churn Prediction (Machine Learning)

- Built an end-to-end Machine Learning pipeline using the IBM Watson Telco Customer Churn dataset (7,043 records) with Python, Pandas, NumPy, and Scikit-learn.
- Performed data preprocessing, feature engineering, and trained Logistic Regression, Decision Tree, Random Forest, and Gradient Boosting models.
- Achieved **80% prediction accuracy** (AUC: 0.84) and developed an interactive dashboard for real-time customer churn analysis.

Student Performance Prediction (Machine Learning)

- Developed predictive Machine Learning models using Python, Pandas, NumPy, and Scikit-learn to forecast student academic performance.
- Performed exploratory data analysis, feature engineering, data preprocessing, and model evaluation to improve model reliability.
- Generated actionable insights that support academic performance monitoring and early student intervention.

Smart Quiz Mobile Application (Flutter)

- Developed a cross-platform quiz application using Flutter and Dart with a responsive and user-friendly interface.
- Implemented dynamic question loading, state management, and real-time score calculation for a seamless user experience.
- Enhanced application performance through responsive UI design and efficient navigation across multiple screens.

CERTIFICATIONS

- Mobile Application Development with Flutter
- Python for Data Science & Artificial Intelligence
- Java Desktop Application Development
- Foundations of Automata Theory

LANGUAGES

English: Fluent — **Urdu:** Native
